

## Introduction

Proficiency in various aerial rescue techniques is an important skill that all climbers should develop. At the Minnesota Society of Arboriculture Aerial Rescue Workshop we will cover assessment procedures; various rescue scenarios, and what equipment you should have to be prepared in the event that you have to perform an aerial rescue!

Saint Paul, MN 55119

## Class Description

The Minnesota Society of Arboriculture (MSA) is proud to present its 2009 Summer Climbing Workshop: Aerial Rescue Techniques. Participants will gain new skills and knowledge by discussing as well as practicing various aerial rescue techniques such as rescuing a climber from a spar, rescue from a single and doubled rope system, and rescuing a climber pinned by a log.

This workshop will demonstrate ways to safely access, evaluate, and efficiently retrieve injured climbing personnel. Techniques will be presented and practiced with experienced facilitators. EMT's will be on hand to answer any of your questions.

Participants are responsible for bringing their own gear. Hardhats, saddles, climbing line, and lanyards as well as safety glasses and boots are required. All equipment shall meet accepted industry standards for tree work.

### **Please Direct Questions To:**
